Portable Temp File Cleaner Crack+ Free [32/64bit] [Updated]

Cleaning up temporary files takes time and effort. Now, this can be done with the help of Portable Temp File Cleaner, a software that will quickly clean your system of unnecessary data. It doesn't require much effort to setup Portable Temp File Cleaner. You just need to press the "Start" button to launch the app, and if you don't like the default settings, you can modify them by browsing the preferences. Once you press the "Start" button, the software quickly scans your entire disk, looking for temporary files. After that, the app will ask you whether you want to clear those files or not. You can manually select specific folders or drives to be cleaned, but the app also shows a bunch of statistics to help you configure the program. If you like, you can select just the temporary files, downloads, or even the Windows memory dump files. Furthermore, you can also select to clean the Chrome, Firefox, Opera, IE and Google Chrome's history, as well as IE and Chrome's recent tabs. Even the recent files for Microsoft Windows can be cleaned as well. Portable Temp File Cleaner can be used to remove debug log files, recent updates cache, Windows Defender History, Recycle Bin items and Windows Explorer temporary files. In case you feel that the program is not as fast as it could be, you can configure it to optimize its performance, thanks to the settings panel. Portable Temp File Cleaner is an easy to use application that can quickly clean your computer of temporary files. An eye-appealing design is there to bring you all its intuitive features, so you don't need more than basic technical knowledge to clean your system. On the other hand, Portable Temp File Cleaner allows you to clean just a specific drive, while also showing a bunch of stats such as free and used space. A log panel is also available to show every single removed item, but it's more important to mention that Portable Temp File Cleaner allows its users to manually configure the data to be removed. For example, the app can take care of Windows memory dump files, debug logs, updates cache, Windows Defender History, Recycle Bin items and recent files. As for browsers, the app can delete cache, history, recent tabs, cookies and download history for Chrome, Firefox, IE and Opera. The cleaning process doesn't take much time and

Portable Temp File Cleaner Crack+

Keystroke Macro Recorder is an easy to use application to easily record all the commands your keyboard generates and then replay those keys at a desired time. It's a powerful utility for professionals that need to create keyboard macros, to study existing ones or simply record useful combinations of keys. This is a portable application and can be installed and run on any Windows machine. KEYMACRO is available in two versions, a free and paid one. The latter has a number of options, such as the possibility to set a hotkey to launch the application or to create a new profile, while the former, free version only has a launcher shortcut that you can add to the desktop. The latest update provides a resizable application window. The program has been optimized for maximum compatibility with all Windows versions, including Windows 7. KeyMACRO: While the initial profile comes with a set of commonly used commands and actions, the user can easily add any new ones via a Windows registry. The interface is easy to understand. The user can choose between five preset profiles or create a new one of his own. The new interface includes a real-time input status, which shows the keyboard commands that the application will replay when the user presses the Record button. This means that you can easily see if the keys you just pressed were actually recorded, otherwise you might have to select the commands manually. While this feature is found only in the paid version, the paid version also has the option to modify the keyboard shortcuts. KeyMACRO has been designed to make things as simple and intuitive as possible. The user can create a new profile from scratch or select a profile from the drop-down menu. Once the user clicks on a profile, he will see its recorded commands in a very intuitive, easy to understand manner. KeyMACRO can be launched from a Windows desktop or from the Windows taskbar, where a shortcut is automatically created. The recorded actions can be run at any time and from any Windows machine. From the downloaded file you can add a profile for your computer to use, modify the existing profile or make your own. The paid version has the ability to modify the keyboard shortcuts. This means that you can add any keyboard command you want as a shortcut. There are other useful features available in the paid version. The user can run the recorded actions by launching a file or folder, add settings for the hotkey and set a custom file for the shortcuts. KeyMACRO provides 81e310abf

Portable Temp File Cleaner Crack Activation Code With Keygen

Leaching behavior of metals from slag dumpsites in Bangladesh and prospect of remediation. This work presents comprehensive study on leachability of heavy metals (Cr, Cu, Mn, Ni, Pb, and Zn) from slag dumpsites in Bangladesh. For this purpose, the methodology of soil leaching test was implemented in this study. The obtained data showed that slag dumpsite soils of Moghbazar area are considerably polluted with heavy metals. The maximum concentrations of Cr, Cu, Mn, Ni, Pb, and Zn were found to be 84.04, 2.56, 14.56, 9.33, 112.55, and 38.95 mg kg⁻¹, respectively. Moreover, values of available and total metal concentration of heavy metals were found to be in ranges of 0.56-0.69 and 1.79-6.47 mg kg⁻¹, respectively. The geo-accumulation index (I_{geo}) and pollution load index (PLI) of these metals in soils were also evaluated. The geo-accumulation of heavy metals indicated that Cr, Cu, Mn, Ni, Pb, and Zn were highly to very highly contaminated at Moghbazar area. The average percentage of Cr, Cu, Mn, Ni, Pb, and Zn were found to be 58.11, 5.84, 38.12, 13.89, 32.78, and
